

About Us

Tangible Analytics Consulting, as a Catalyst Partner, is at the forefront of transforming business operations by leveraging Zoho's Catalyst platform. With a deep expertise in data analytics and a strong grasp on contemporary cloud technologies, we assist organizations in developing, deploying, and managing state-of-the-art applications that drive optimal performance and productivity

Key Features:

Accelerated Development: Use Catalyst to shorten development cycles and quickly build applications.

Scalability & Flexibility: Build applications that easily adapt to fluctuating workloads and business needs.

Enhanced Security: Advanced features ensure application protection, including data access control, encryption, and API management.

Turbocharge Your Application Development

Catalyst by Zoho is a comprehensive, cloud-based platform devised for propelling the development, deployment, and management of contemporary applications. Packed with a diverse set of tools, APIs, and services, Catalyst empowers developers to bring to life powerful applications streamlining businesses, boosting productivity, and enhancing user experiences.

Benefits of Catalyst by Zoho

- **Serverless Computing:** Focus on code, auto-scale apps, and reduce costs with a pay-as-you-go model.
- **Microservices Architecture:** Design loosely-coupled, maintainable, scalable, and fault-tolerant apps.
- **API Gateway:** Secure API access, custom authentication policies, rate limiting, and usage insights.
- **Data Storage & Management:** NoSQL databases and object storage, advanced querying, and data security.
- **Zoho Ecosystem Integration:** Accelerate development by integrating apps with Zoho suite products.

Cost Savings: A serverless computing and pay-as-you-go pricing model significantly reduces costs.
